# COMPANY OVERVIEW

AGA Contracting stands as one of the foremost organizations in Saudi Arabia. Our company is known for its innovative and value-driven approach in the fields of Civil, Equipment and Manpower supply, Mechanical, Fabrication, Erection of Steel Structures and tanks, MEP, E&I, HVAC, Firefighting, Scaffolding, Thermal Insulation, Painting, Fireproofing, Refractory, and other related Industrial work. Additionally, we specialize in Turnaround Shutdown and Maintenance services. Currently headquartered in Yanbu Al Bahr, Kingdom of Saudi Arabia, we are dedicated to serving the Oil and Gas Field Industries, undertaking construction and maintenance projects. Furthermore, we extend our expertise to the private sector and beyond in the realm of construction.

## Our Vision

Our goal is to build a strong and enduring reputation for outstanding construction by exceeding current standards in expertise, client happiness, and environmental stewardship. Additionally, we aspire to be the top choice for complex and prestigious projects.

## Our Mission

We strive to deliver exceptional construction services with integrity, professionalism, and a focus on quality and safety. Through our expertise, innovation, and sustainable practices, we aim to exceed client expectations and create lasting value for them, our employees, and the communities we serve. We are dedicated to fostering a culture of teamwork, respect, and continuous improvement, while also being a reliable partner in building a brighter and more sustainable future.

# SAFETY POLICY

AGA Contracting pays every importance to Good health, Safety performance at all areas of operations to achieve business objectives. Management is committed to take an integrated approach where managing health and safety forms as a part of the overall business strategy, protection of human resources, properties, environment and the same commitment will be demonstrated by all levels of supervision in the organization.

We will at all times comply with applicable Saudi Government regulations, guidelines and Industry rules. AGA assures that projects will be carried out with high degree of safety to attain this objective. Our projects Management will strive to provide a safe and healthy environment that is free from recognized potential hazards and will maintain its facilities and equipment s at maximum safe operating standards.

AGA ensures the knowledgeable and safety conscious employees utilizing safe techniques , Equipment practices are the corner stone for the success of our goal. All members of our organization are well aware that safe work practices take precedence over shortcuts and expedient actions.

AGA Management and employees are bound to agree that safety is Moral, Legitimate obligation in line with business objectives and instructions of Construction Safety Manual and other related requirements and also adhere to the additional measures, which protect injury of personnel and damage to properties

## OUR CORE BUSINESS

- Construction
  - Civil Works
  - Mechanical works
  - Electrical works
  - HVAC & Chiller
  - Scaffolding
  - Fire proofing
  - Sand blasting & painting
  - Thermal Insulation
  - Fire fighting
  - Refractory
  - Moter Repair & Rewinding
  - Landscaping
- 

# CIVIL

Civil work service are one of the most important part of our company. AGA Civil works comprises of activities related to construction, maintenance and repair work. The teams involved in such activities are skilled craftsmen who under the guidance of Project manager execute the project. Project delivery team, providing expertise and leadership during the field of execution forms the integral part of team.

The range of work provided by AGA included:

## 1. Construction

- . Tank foundation for equipment and structure
- . Building
- . Drainage
- . Sewage system
- . Pavements

## 2. Maintenance and repair works

- . Heavy equipments, oil tank, water tank
- . Roads
- . Painting and sand blasting of gas, oil & water tanks

AGA has portrayed tremendous expertise in mentioned services and delivered quality woks. In accordance with the needs and requirements of the client.

### 3. Asphalt Works

Since our humble beginnings our core primary focus has been developing and providing superior full-service asphalt paving services to all our Commercial, Industrial, Municipal & Residential clients. We know the importance and have the experience to ensure that we deliver safe, quality work in a timely fashion while maintaining a competitive price point and we have developed a solid reputation in being able to do so for many general contractors, commercial property owners and managers, school boards as well as municipalities.

#### Asphalt Paving, as well as Site Drainage / Storm Sewer work.

We strive to be the industry leaders and we execute with dedicated professionals and equipment to your site via dedicated crews:

- Site Servicing (Sewer&Watermain)
- Excavating & Grading
- Fine-grading
- Asphalt Paving

5 Star Paving has grown by leaps and bounds over the past years into a well-diversified construction firm that provides their clients with all aspects in complete Parking Lot Construction which includes Site Servicing Construction, Excavating & Grading as well as Asphalt Paving.

#### 4. Road Marking

AGA contracting est. engaged in the application / installation of road marking materials, signage, delineation and work zone safety. We are one of leading Road marking company in Saudi Arabia. Our team specializes in urban and national roads, as well as on small industry projects, such as office parks and shopping malls.

#### Our Road Marking services range from:

- Solvent Based Road Markings
- Water Based Road Markings
- Thermo Plastic Road Markings
- Traffic Accommodation.

Road marking machinery: thermoplastic road marking machines, cold solvent airless road marking machines, cold solvent air-auxiliary road marking machines, two component road marking machines, pre-heater, road marking remover, auxiliary road marking machinery.

Road marking paints: thermoplastic road marking paint, cold solvent road marking paint, heating solvent road marking paint, two-component road marking paint and glass beads.

With a long history of marking and supplying high-quality road safety systems, PGI is a recognized market leader in application of road marking. PGI has an extremely comprehensive range and is committed to providing world-class, industry-leading services

- Thermoplastic Road Marking Service
- Solvent airless road marking Service
- Cold solvent air-auxiliary road marking Company
- Two Component Road Marking Service
- Road marking remover Service
- Auxiliary road marking machinery.

## LAMINATION FOR FRP, GRP, RTR

- AGA is dealing also in non-metallic works which includes FRP, GRP, RTR Piping.
- We do installation and lamination works of FRP, GRP, RTR pipes.
- Well experienced in handling, laying, jointing, site testing and installation and erection.
- Our GRP/FRP laminators take great care in ensuring a meticulous lamination process. They have a deep understanding of the properties and characteristics of GRP/FRP materials.

**GRE BUTT JOINT**

# MECHANICAL

Every activity of every Project is carried out by a team of specialized work-force coupled with effective management. Mechanical activities as such that are stipulated in the contract of every client are executed by the team maintaining the quality of services rendered. The work force implements most economical, cost effect method while making no compromise in the quality of operation and maintenance.

## Our key areas include:

- Overhaul
- Modification
- Installation, cleaning and re-assembling
- Installation & Fabrication of Pipeline
- Installation of FRP pipelines and FRP lining of tanks
- Start-up and Test Operation

These functions are implemented in all work places of AGA for the equipment, machineries, special equipment, heat exchangers and integrated accessories of:

- Water desalination plant
- Power plant
- Installation & Maintenance of Fire Fighting System
- Fabrication of pipe line, steel structure

AGA specializes in carrying out services giving high importance to maintaining project specifications.

# ELECTRICAL

Responsibilities of electrical works of project held by AGA are implemented throughout the project. Safety measures are taken for all scope of work that suits the need of the client.

## The areas of expertise of AGA include:

- Installation of complete electrical system for plants and machineries
- Power, Control
- Cables, Motor control systems
- Cable tray system
- Switches, Rack system
- Transformers, Telephone

Our building aptitude, the capacity to source and introduce a wide range of sorts of electrical items, our strict adherence to testing and our consideration regarding quality, wellbeing and point by point designing designs separates us from other electrical contractual workers. Our group comprises of gifted skill workers with the responsibility to introduce each activity up to the stamp and can design any extend with an end goal to lessen costs without giving up quality and productivity's additionally give benefits in new construction, redesigns, building, and upkeep of structures. AGA sees the quality as its life saver, client's request as its inspiration, advancement, and change as a major aspect of the improvement in electrical industry.

# HVAC & CHILLER

**AGA has workmen whose expertise lies in:**

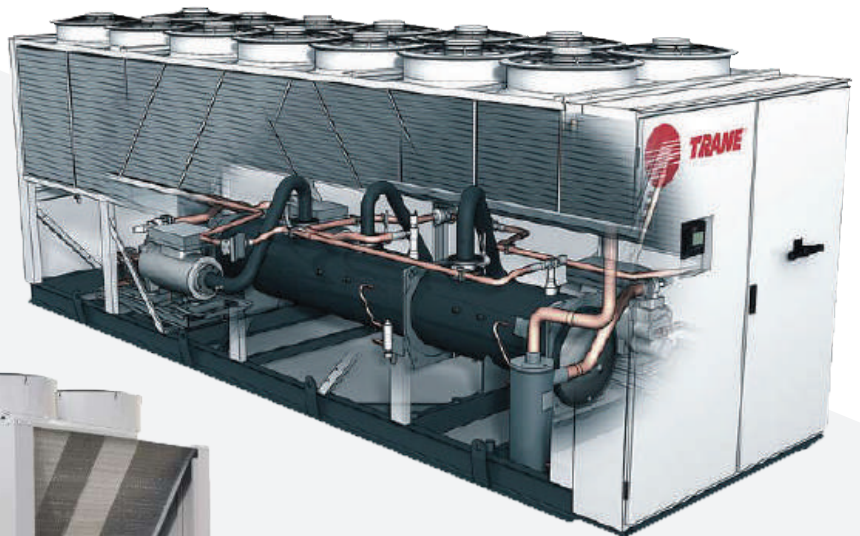

- installation of chiller
- Air handling units,
- Package Air conditioning
- Duct works.

Maintaining the quality of SMACNA and comprising International Specifications, we fabricate our own ducting material in our manufacturing center. We install and maintain HVAC systems.

We provide services to maintain top operating conditions for long term **use and hence save money.**Our services in HVAC include:

- Asset Management
- Design and Construction
- Mechanical Ventilation and Air conditioning
- Service on Demand

Our strong in-house capabilities in design, procurement, project management, engineering and after-sales service help us meet your expectations. Our objective is to have continuous access to new technology and adopt effectively, understand changing customer needs in the present-day environment. In this process we aim to provide our customer with effective installation and other maintenance service, which is monitored through plant up time and response time. We work as a friendly HVAC solution provider to all our most valuable clients.

# SCAFFOLDING

A Scaffold is a temporary framework used by the workforce to support and aid Construction and other maintenance related work of all man-made structures, AGA has developed loyal customers over the years through quality services. We have huge quality scaffolding materials enough to handle big projects like Plant turnarounds.

Our scaffold team is capable of handling projects of any scale and budget. We provide from work of the construction of buildings, etc. AGA scaffolding to meet the needs and requirements of projects throughout the nation.

Our company ensures the scaffolding services conform to the standards and requirements of industrial sector.

## AGA services includes:

- Erection Scaffolding
  - Hanging Scaffolding
  - Tower Scaffolding
  - Mobile Tower Scaffolding
  - Rental Services
- 

## FIRE PROOFING

Fireproofing the structure is a safety precaution undertaken in the event of fire. The key is to allow the fire to take effect slowly so that the occupants will have ample time to vacate the premises during fire and get to safety.

AGA provide fireproofing services to industrial and commercial sectors since the time it has established. Irrespective of Cementitious or Intumescent fireproofing materials for all sectors are provided by AGA. With skilled labor and certified material manufacturer, technical assistance, AGA provides complete solution for installation of fire-proofing materials.

We accommodate every aspect of fire proofing needs. Our services are for a wide array of industries that resist the fire from spreading in the event of fire.

### **Benefits of the fire proofing are many:**

- Products are tested to expand the life of the building or structure.
- Increases applicator productivity due to fast and efficient application
- Low-in-places-cost
- Proven in-place performance
- Resists damage from air erosion and abrasion.

# SAND BLASTING & PAINTING

**AGA painting department includes large numbers of:**

- Mobile blasting and recovery unit systems,
- Climate control unit and mobile painting units,
- As well as a large number of Hydra Cat units for two component solventfree lining are also available for projects outside the facility.

# ONSITE REPAIR & SHUT DOWN JOBS

With our experience in project planning, team management, and specialist welding capabilities, AGA Contracting is able to respond to customer requests for critical refinery and other industrial maintenance works.

Our approach and problem solving ability allows us to react promptly and effectively to complex job requirements and demanding schedules of all refineries, petrochemical and cement factories around Yanbu.

We also have a dedicated skilled workforce who are experts in tank repairs.

# THERMAL INSULATION

The idea behind thermal induction is to maintain the heat within the building regardless of the climate change outside. It is an important technology carried out during construction activities. The purpose of thermal insulation is to provide comfort and protect the occupants from outside climate. The process focuses on the basic building envelopes such as walls, floor and roof.

AGA provides industrial insulation properties coupled with natural elements for the process of Thermal Insulation. We are specialized in construction and maintenance work for thermal insulation for tanks, equipment, and pipelines, Serving Refineries, Petrochemical, and Power plants. We offer a full insulation system from material supply, fabrication and site installation for all types of insulation.

## **INSULATION SERVICES:**

- Steam Tracing Lines.
- Pipelines & Fittings.
- Tanks
- Power Generation Turbines (Removable Pads)
- Liquid Gas Container
- Boilers & Industrial Furnaces

Fabrication We have fully equipped fabrication materials that meet the demanding requirements of all industrial sectors.

We have a full range of machineries exclusively designed for fabricating all types of insulation material such as:

- Cellular Glass.
- Calcium Silicate

# FIRE FIGHTING

AGA has the capacity to supply, install, test, and commission all known fire protection and security systems. Our professional team is well qualified and industry certified to engineer, and implement systems across the spectrum we serve.

## **AGA offers:**

1. Field engineering services to our prestigious project to determine the on-site solution to minimize the time required for any installation.
2. Quality control during the project execution.
3. Gas Mapping Study

## **Our services include but limited to:**

- 1 Fire Protection Engineering
- 1 Fire, Life Safety and Accessibility Code Consulting
- 1 Fire, Smoke, and Egress Modelling
- 1 Quantitative Risk Assessment and Hazard Analysis
- 1 Construction Administration
- 1 Emergency Planning
- 1 Combustible Dust Hazards
- 1 Condition Assessments
- 1 Mass Notification Systems (MNS)
- 1 Emergency Planning
- 1 Installation and Commissioning

## REFRACTORY

Refractory materials are those which regain its strength at high temperatures. AGA has all kinds of refractory materials available for industrial applications. We play a very important role in the field of refractory. Refractory is highly wanted by various industries such as steel and iron, glass, cement, ceramic, petrochemical, fertilizer, water and power.

Refractory materials constitute lining to metal surfaces that are capable of withstanding high temperature surfaces such as furnaces, reactors, etc. They should also be able to withstand adverse conditions as well. Other physical phenomenon such as wear and tear and erosion caused due to chemical reactions should also be avoided.

AGA has trained and highly skilled engineers whose expertise has proven beneficial to refractory purposes. They carry out the installation process with much efficiency. The process involve refractory casting by

- Manual & Gunning, Brick installation, Ceramic modules, Blankets

Refractory services that are provided include Design of Refractory Lining, Technical Assistance, Supply of fresh materials and its Installation. AGA is one of the leading refractory specialists providing refractory services within the scheduled time period and with the best team supporting the project. We focus on complete customer satisfaction and thrive to provide quality services that will yield long term benefits. AGA has successfully completed undertaken projects with commendable efficiency and execution.

## MANPOWER SUPPLY

With the fast-changing global scenario, Companies are increasingly feeling the need for optimal utilization of all resources. Our resource always helps in recruiting the right candidates for the prescribed.

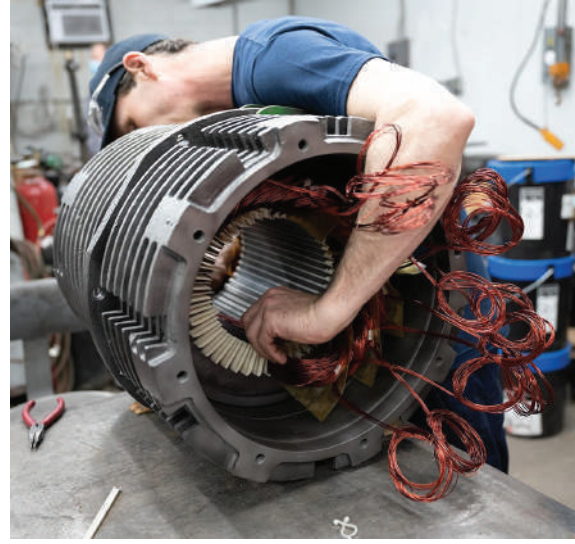

## HEAVY EQUIPMENTS RENTAL

The equipment rental fleet in AGA is one of the strongest in the industry. To initially serve the diverse requirements of industries, we have build up a wideranging fleet of heavy construction equipment.

# MOTOR REPAIR & REWINDING

We specialize in rewinding all types of motors, from small appliances to large industrial machines. With state-of-the-art equipment and industry best practices, we guarantee top-quality results.

- **Maintenance and Repair:** Alongside motor rewinding, we offer comprehensive maintenance and repair services to prolong the lifespan of your equipment and prevent costly breakdowns.
- **Emergency Services:** We're ready to assist you 24/7 because we understand motor failures can happen anytime. Simply contact us!

## What Sets Smart Technical Services Apart:

**Experience:** With years of industry experience, we have mastered motor rewinding techniques and technologies.

**Skilled Team:** Our technicians are highly trained and knowledgeable, ensuring your motors are in capable hands.

**Quality Assurance:** We are committed to delivering high-quality results that exceed your expectations.

**Customer-Centric Approach:** Your satisfaction is our top priority. We work closely with you to understand your unique needs and provide tailored solutions.

# LANDSCAPING

Our services are fully supported by a complete organization of managers and a large workforce, backed by the support of the Initial Group, facilitating us to undertake and execute small and large-scale projects with complete efficiency.

## Landscape Construction

- Hardscape Installation
- Construction
- Horticulture
- Irrigation Systems
- Landscape Design
- Indoor Plants Maintenance
- Plants Cuts & Pruning
- Consultancy Services
